

iTouch series

Available with 10" screen

The Genius iTouch Series is revolutionizing the way we interface and manage with our livestock production controllers.

- ✓ Navigates like an iPad by simply touching, swiping, or dragging your finger on the touch screen.
- ✓ Manage your building like a genius by reducing production cost and offering the optimal conditions for your animals.
- ✓ Intuitive system view animation allows for quick confirmation of input / output status.
- ✓ WiFi/WiFarm option available to allow a wireless connection to Internet or a PC.
- ✓ Realtime access anywhere in the world (when an Internet connection is available).
- ✓ Compare results of your actual batch with a batch from the past.
- ✓ Warning message sent via text message (SMS) or email when out of limits conditions occurs.

COMPATIBLE WITH:

Online monitoring and management

Management software

Wireless Network
