

EFFECTIVE: MAY 1, 2016

## **Pur AG™ AIR FILTRATION SYSTEM by Clarcor Air**

The only complete filtration system to protect your livestock

- Significantly reduces the aerosol transmission of PRRS virus and myxo bacteria
- Has a complete system of products for easy and practical installations that reduces the chance of non-filtered air entering the barn
- Clarcor has filtered more swine barns than any other filter company
- LOG 6 - 7 Removal Performance/Merv 15
- Delivers more airflow than competitor products
- Tested and researched extensively by the Minnesota Swine Disease Eradication Center (SDEC)

**CLARCOR and EXACON can recommend a practical and safe solution for you.**  
**The products listed below are only some of the most common products used to reduce the chance of PRRS using a system of filtering the air prior to entering the ceiling inlet.**  
**Other methods are available such as eve filtering and tunnel ventilations.**
